

tral route, and not be placed in a position secondary to Hannibal and Warsaw, they should open their eyes to what is transpiring around them. It is true, the company still make fair professions of intending to try to build the road, sometimes; but professions without facts, will not satisfy the public who are interested, or the legislature, from whom they obtained their charter.

If nothing can, otherwise, be done, would not the interests of Quincy require, that the privilege of building the road, to Clayton, be transferred to those who will secure the connection with what may prove a national thoroughfare, and which will powerfully affect the future destinies of Quincy. Intimations have been circulated here, obtained from those connected with the Morgan company, that the above company would now rather build the road to Clayton, than to Hannibal, if an arrangement could be effected granting to them the privilege. We give these reports as we have received them; but if true, the interests of all concerned might require that, the opportunity be embraced even a present small sacrifice, if necessary; thus having both roads progressing at once, and thus perhaps barring forever the Pike Co. road. If immediate steps are taken, and satisfactory evidences are given, by the letting of the contract &c., that the road would be built to Meredosia, we are satisfied that our county court would be sustained, in still subscribing the stock voted, last fall, which has never as yet been called for by the company. But if the whole matter be deferred until next spring, events will certainly have then transpired, rendering such aid of no avail. We are not actuated, in our remarks by any hostile feeling towards the Quincy Co., but we are emphatically, in for the immediate completion of the Meredosia road. We think that the interests of those on the line of the road of the city of Quincy, and justice to the Morgan Co., who have been compelled to extend their road to Meredosia, demand, on the part of the Quincy company, the most active exertions to complete the road, somehow, without further delay; and we intend to continue to stir up this subject with a long pole, so long as there remains the shadow of a hope.

THE INTRODUCTION OF FILLEY'S STOVES

Into Northern Missouri, to any extent, has been in the last three years; since which time they have been gradually increasing the manufacture and sale of them; and although, owing to their being light and smooth, and something new, some little difficulty attended the sale and use at first, yet by always making Stoves and Castings of the best quality of Scotch Pig and Missouri Mountain Iron, they have proved to withstand fire better than any other Casting made in the western country. The furnace castings and hollow-ware particularly, have been superseded by it, wherever it has been brought into use, and always given satisfaction. Having lived here a number of years, and being permanently located here, purchasers can rely on our guarantee as to the quality of the article sold by us; and as to the operation of our celebrated Prize-Premium Cook Stove, just read the certificates of those who have used them, and are using them now. And another advantage a purchaser will have in buying a St. Louis stove of us, he would not only be getting a stove made of the best material in the world, but he can at any time get an odd piece or plate without any charge, by letting us know that such is wanted, as all our stoves are warranted, and, in case of imperfection, the article will be promptly made good to the purchaser, which he will not find the case with Cincinnati, Chicago, Pittsburgh, and Eastern made Stoves, as you cannot get any odd pieces. Even if they were warranted, it would be impossible to get odd plates from such a distance.

We, the undersigned, having used the St. Louis Stoves manufactured by G. F. Filley, of St. Louis, and sold by CARTER W. BRYAN, at Hannibal, Mo., take pleasure in recommending them to the public as superior in point of draft, durability, economy, convenience and ease of regulation, to any stove which we have ever used:

NEW COOK STOVES!!

Persons wishing to buy stoves, should give us a call, and examine our new patterns of

Having secured the agency of them for this city. This stove possesses advantages over common stoves, in thickness of the plate, and improvements in draft. It is given up by all stove dealers and manufacturers, to be the best pattern for a descending flue, of any stove now made East or West.

This stove was patented September, 1852, and wherever they have been used, have given general satisfaction. This stove weighs some forty pounds more to the number than any other stove ever brought to this city. The plates in them are from one-half to three-fourths of an inch in thickness. No. 1 weighs over 200 pounds. We warrant them all against fires. These stoves have a Patent Hot Air Flue, which carries the heat that is generated under the fire-plate down the front part of the stove, between two thick plates to the draft at the bottom of the stove, thereby adding great heat to bake with on the bottom, and remedying that which has always been a fault with stoves of a descending flue, heretofore. FIELD'S SCRAP BOOK—New Edition.

Literary and Miscellaneous Scrap Book. CONSISTING of Tales and Anecdotes—Biographical, Historical, Patriotic, Moral, Religious, and Sentimental Pieces, in Prose and Poetry. Compiled by William Fields. Second edition, revised and improved.

The Footpath and Highway; or, WANDERINGS of an American in Great Britain, in 1851 and '52. By Benjamin Morgan. This volume embodies the observations of the author, made during eight months wandering, as a correspondent for American Journals; and as he traveled much on foot, differs essentially from those on the same countries, by other writers.

New Themes for the Protestant Clergy;

CREEDS without Charity, Theology without Humanity, and Protestantism without Christianity; with Notes by the Editor on the Literature of Charity, Population, Pauperism, Political Economy, and Protestantism. The great question which the book discusses is, whether the Church of this age is what the primitive Church was, and whether Christians—both pastors and people—are doing their duty. Our author believes not, and, to our mind, he has made out a strong case. He thinks there is abundant room for reform at the present time, and that it is needed almost as much as in the days of Luther.

Barber's Shop.

PETER JOHNSON.

RESPECTFULLY offers his services to the public. He keeps the best quality of razors, and keeps them sharp. He will always pay strict attention to cleanliness and neatness. He cuts and dresses hair in a style that never fails to please his customers. As a knight of the scissors and razor he yields to none in Hannibal. His charges are reasonably low. As he intends to continue fitting up and improving his establishment, as fast as his means will allow, he hopes to have the patronage of the citizens of Hannibal whose well known chief characteristic of energy, leads them to desire to see everything on the progressive march. Recollect it is the shop nearest to Hickman's Stove Store. It is on the west side of Main street, two doors north of Bird street. (ap-23-d-ly)
